

OVERVIEW

The 7-inch capacitive touch screen panel is a sleek and intuitive wall-mounted interface designed as a display companion for the DALION system. It enables users to interact with dashboards created in DALION views for visualization and control of room lighting. This panel can serve as a replacement for standard wall switches, offering a modern and customizable lighting control experience.

KEY FEATURES

- ✓ Display: 7-inch capacitive touch screen with a responsive interface.
- ✓ Integration: Compatible with the DALION lighting system for DALI lighting control.
- ✓ Interface: Displays dashboards created in DALION views for room lighting management.
- ✓ Mounting: Wall-mount design for various installations.
- ✓ Connectivity: Wired and wireless options.
- ✓ Power Options: Can be powered via 24VDC or Power over Ethernet (PoE).
- ✓ Switch Replacement: Alternative to traditional wall switches.

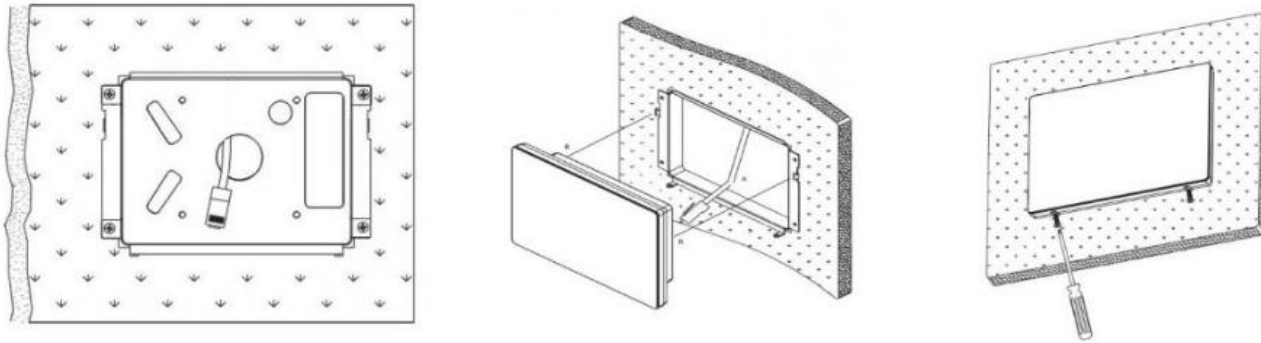

APPLICATIONS

- Office buildings
- Hotels
- Smart homes
- Commercial lighting control
- Educational institutions
